Profile

Frontend Developer Jr, self-taughter.

Focused on web development and applying the technologies I manage and learned along the way to the projects presented to me that I must develop.

With a good attitude, open to communication and coworking, eager to contribute from the position that I am in, and constantly learning.

Experience

○ Freelance
June 2022-Actualidad

I carried out the development of 3 freelance projects for different clients in my city. In these projects, I applied my Frontend and Backend knowledge, delivering them on time. They served as a way to test my abilities and enhance my performance when working in a team.

○ TOB Group Solutions - Frontend Developer
March 2023-Actualidad

My role involves developing applications and websites within the Frontend framework, implementing pages and views according to the design proposed by the UX team, and utilizing current technologies to achieve better functionality and performance.

-Stack: Next.js | NestJS | ChakraUI | MySQL | Git
